

Your Fleet. Smarter. Safer.

A connected fleet management platform that brings together live tracking, intelligent video, driver safety insights, and powerful reporting — all in one place.

Global Reach. Trusted Partner.

Delivering safety solutions.
Powering partnerships worldwide.

1976

Established Since 1976

Brigade has been distributing products via partners since 1976, and is financially secure with a turnover exceeding \$100m.

Global Presence. Local Expertise.

We have offices and 280+ staff in US, Canada, UK, France, Netherlands, Germany, Poland, and exclusive distributors in more than 80 countries.

Stock. Service. Support.

Brigade holds in excess of \$30m in stock and prides ourselves on service and support. Our warehouse ships more than 1.5m safety products per annum with majority of orders being dispatched same day for next day delivery.

Fast. Reliable. Every Time.

Same day dispatch for the majority of orders ensures our partners and customers get the products they need, when they need them.

Certified. Compliant. Committed.

Brigade is compliant with ISO27001, ISO9001, ISO14001, ISO 45001, FORS, CLOCS, TFL and carry FCC, CE, E-mark certifications.

User Roles

Haloniq In Action

Real-time visibility. Smarter decisions. Safer fleets.

Live Tracking & Timeline

Track vehicles in real time and review journeys with detailed timelines

Event Data & Video

Access event details, risk alerts, sensor data, and multi-channel video

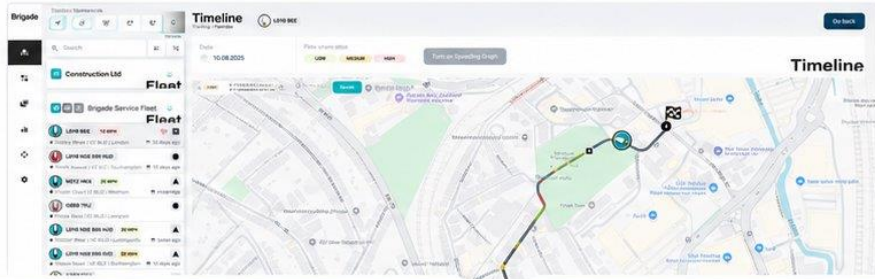

Video Library

Search, filter, and export footage across your fleet

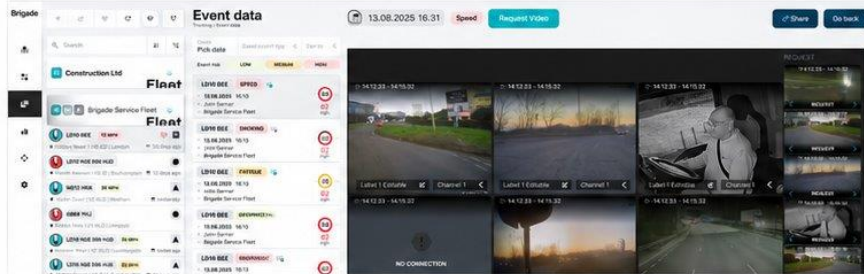

Live Tracking & Timeline

Monitor vehicle locations in real time and view complete journey timelines with key events.

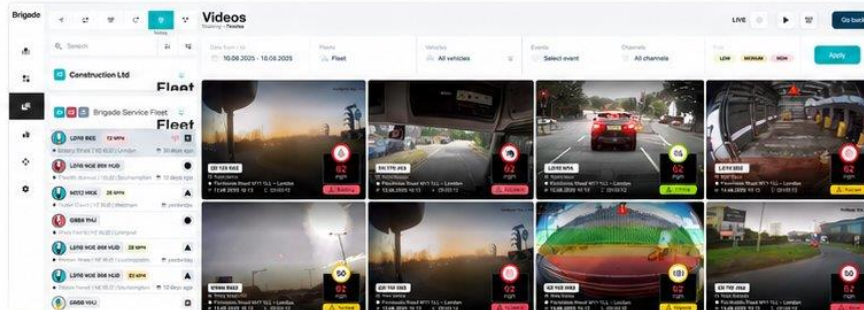

Event Data & Video

Review event details, risk alerts, sensor data, and multi-channel video in one place.

Video Library

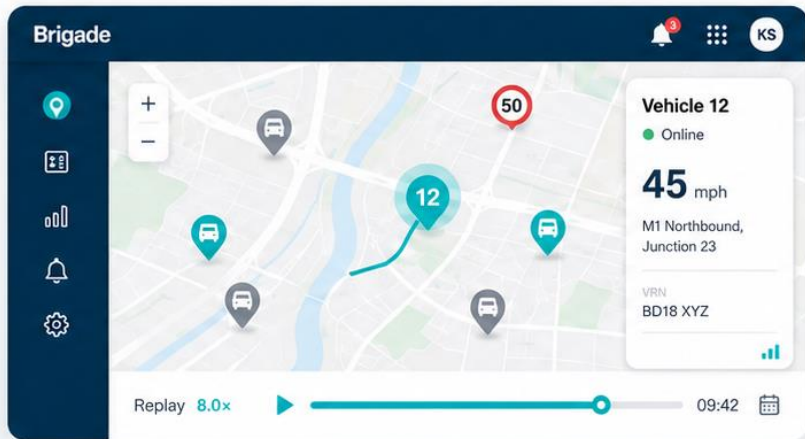

Search, filter, and export video footage quickly across fleets, events, and channels.

Live GPS Tracking

Monitor your entire fleet in real time on an interactive map.

High-frequency GPS updates across all vehicles

Vehicle route timeline with daily activity summary

Interactive map with smart clustering for large fleets

Vehicle card: speed, location, VRN, and live status

Vehicle Status: online, offline, ODO, idling, alerts

Road speed limit display with violation highlights

Customisable SVG vehicle icons for map clarity

Journey replay at up to 16x speed on the map

See Everything. Miss Nothing.

Live Streaming

- Real-time multi-camera feeds
- Cross-device split-view
- Low-latency streaming

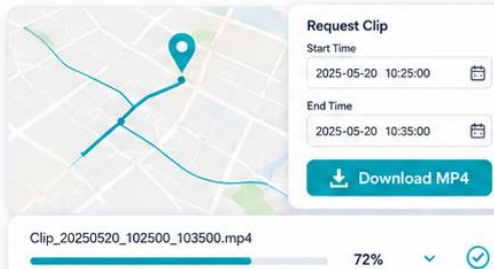

Playback & Timeline

- Speed & G-force graphs
- Event markers on timeline
- Interactive mini-map

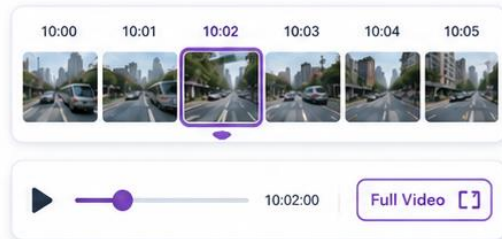

On-Demand Retrieval

- Click-on-map selection
- Manual timestamp entry
- MP4 download with tracking
- One click shareable video

Hyper-Lapse Review

- 1 snapshot per minute
- Rapid incident scanning
- Toggle to full video

Intelligent Event Processing

Detected Events

Harsh braking

Sharp turns & cornering

Rapid acceleration

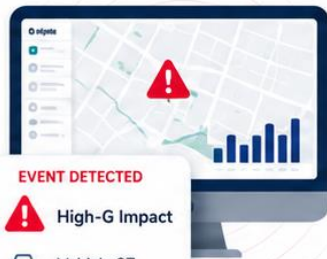

Speeding

Idling

Collision & high-G impact

EVENT DETECTED

High-G Impact

Vehicle 27

10:25:30

Automated Workflows

Auto-retrieve video or snapshots on event

Generate alerts across multiple channels

Flag events for reporting or review

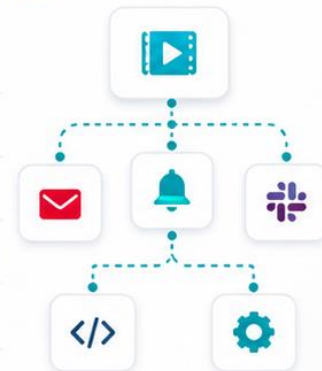

Trigger third-party API calls via WebHooks

Custom rules: urban-only alerts, PTO suppression

Organisation-level event preferences

Weather-Enriched Events

Optionally enrich every event with temperature, rain status, daylight indicator, and cloud coverage for deeper analytics.

Understand Every Route

Powerful tools to visualise, analyse and replay every journey with clarity.

Speed-Based Trail Colouring

Routes dynamically colour-coded against road speed limits — green through to red.

01

Multi-Journey View

Multiple journeys displayed with unique colours and numbered start/end markers.

02

Event Overlay

Speeding, harsh braking, and cornering events plotted as interactive map markers.

03

Map Matching

GPS points snapped to roads via HERE Maps. Toggleable per fleet.

04

Interactive GPS Points

Click any point to request video or jump to event details.

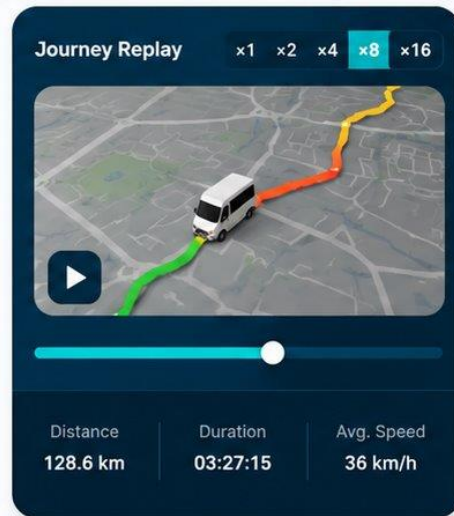

05

Journey Replay

Playback on map with visual slider. Speeds: x1, x2, x4, x8, x16.

06

Driver Safety

Protect your drivers. Improve performance.

Behaviour Monitoring

Track harsh braking, acceleration, cornering, fatigue, and distraction. Individual driver scoring dashboards.

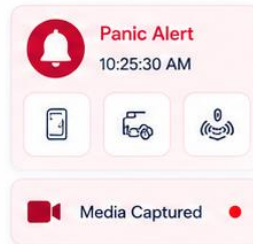

ADAS & DMS

Lane departure, forward collision, pedestrian detection, driver fatigue, and distraction alerts from cameras.

Panic & Device Alarms

Instant panic button alerts with media capture. I/O state alarms for doors, PTO, reverse signals.

Safety Dashboard

Events per 100 miles, trend comparisons, drill-down views. Identify outlier vehicles and drivers.

Define Boundaries. Automate Actions.

Create smart geofences that trigger real-time alerts and provide total visibility and control.

Create Custom Zones

Depots, customer sites, restricted areas
— any time, any day, any speed, shape or size.

Define & Edit in Real Time

Draw zones by shape and type with
real-time rule editing.

Automatic Triggers

Instant triggers on zone entry or exit.

Smart Alerts & Updates

Email alerts and platform status updates
(e.g. "vehicle in depot").

Zone History Logs

View entry/exit timestamps for every
vehicle.

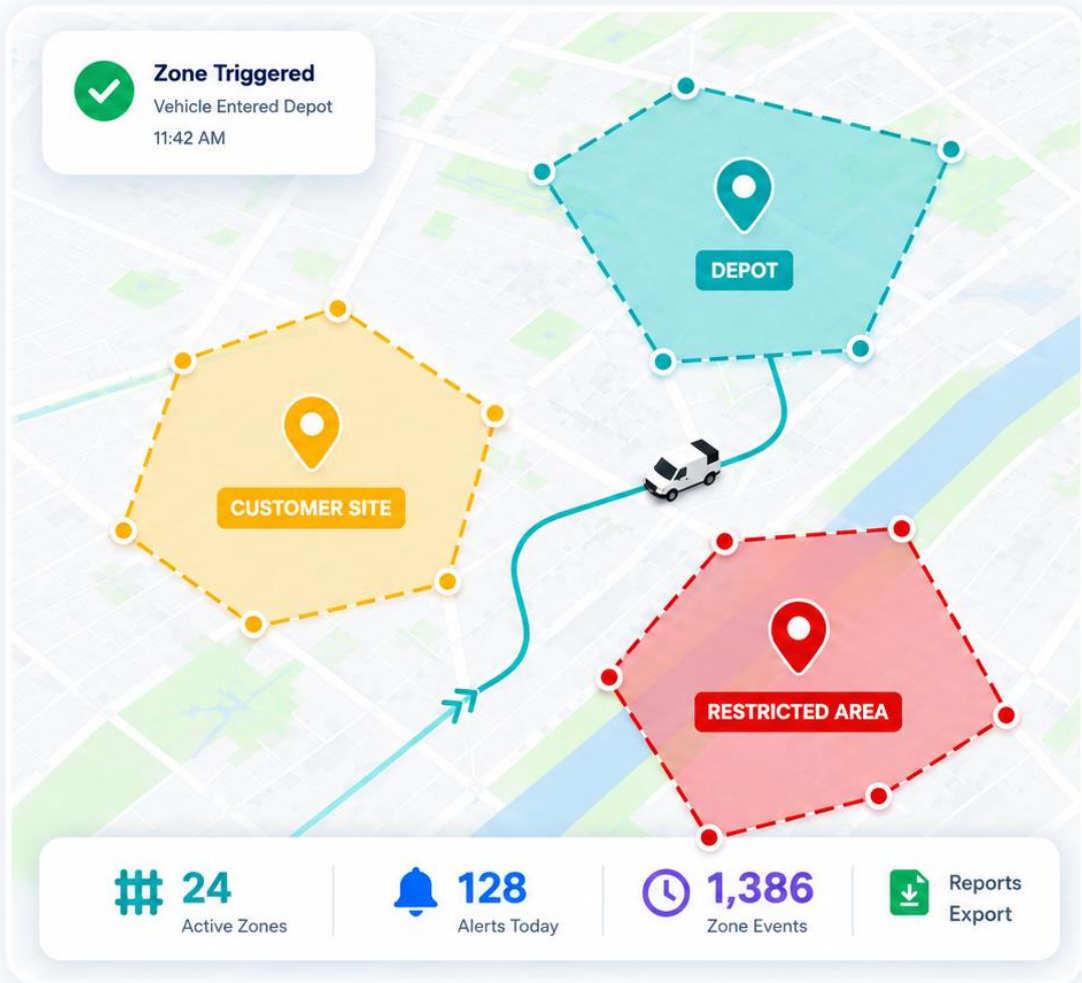

Downloadable Reports

Filter by date, vehicle, and zone type for
actionable insights.

Built to Scale

Support unlimited zones across your organisation.

Data-Driven Fleet Intelligence

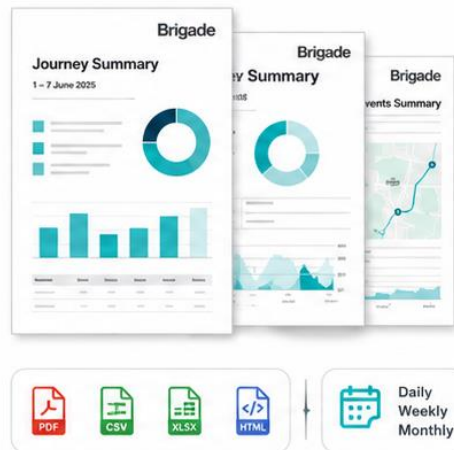

Fleet Overview Dashboard

- Driver behaviour charts
- Driver state monitoring
- ADAS event summaries
- Safety & security breakdown
- Speeding summaries
- KPIs: journeys, distance, idling, devices

Scheduled Reports

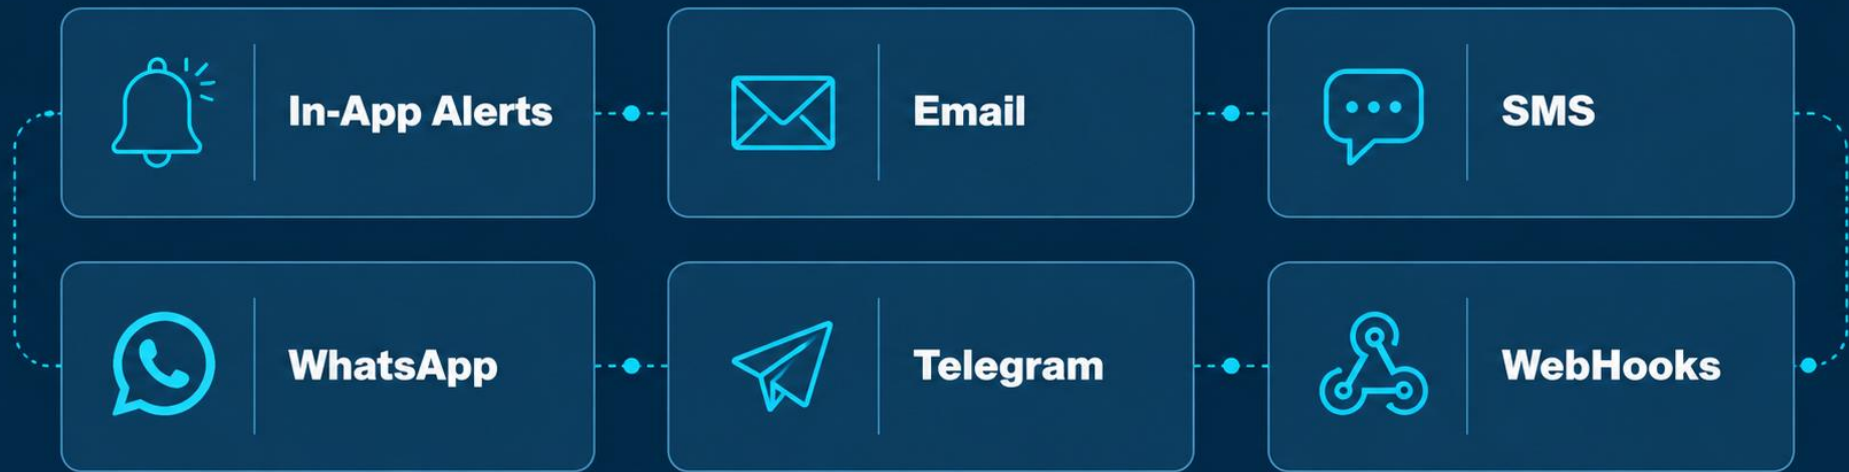

- Journey summary, detailed & graphical
- Mileage summary & detailed
- Events summary & alarm report
- Working hours report
- Export: PDF, CSV, XLSX, HTML
- Schedule: daily, weekly, monthly delivery

Interactive drill-down: click any chart to see top vehicles or drivers, then export to PDF, CSV, or XLSX.
Customisable per user.

Multi-Channel Notifications

Stay informed through the channels your team already uses.

Configure notification rules by event type and severity. Combine channels for critical alerts.

Organised. Secure. Role-Based.

Engineer User

Fleet Structure

Hierarchical organisation structure

Fleets, cost centres, and regions

Flexible tagging for drivers, vehicles, alerts

SSO via SAML, OAuth2, OpenID Connect

Multi-factor authentication

IP-based login restrictions

Data retention configurable per type

Odometer tracking with manual overwrite

Device-Agnostic by Design

Brigade MDR Series

MDR 500 • MDR 600 • MDR 700

- Live GPS & multi-channel video

- Event recording & playback

- Driver behaviour (ADAS/DMS)

- Snapshot requests

- Remote device configuration

- Firmware management

- Storage & I/O monitoring

Brigade Telematics

FMC003 • FMC234 • FMC650 • FMC920

- Real-time & historic GPS

- Fuel level & consumption (CANBus)

- Odometer (GPS & FMS CAN)

- Vehicle fault codes (DTCs)

- Unified data normalisation

One platform. Any device. **Complete visibility** across your fleet.

AI Connected Dashcams

Compact, windscreen-mounted cameras with on-board AI for real-time road and driver monitoring.

AI ROAD ALERTS
Detect risk in real time

DRIVER MONITORING
DSC, fatigue, distraction

4G CONNECTED
Live view, alerts and updates

SECURE & RELIABLE
Built for fleets

01

DC-204-AI

UK / EU • 4G AI Connected

- ✓ Dual camera: 1920p forward-facing + 1080p driver-facing
- ✓ AI road alerts (ADAS): collision, lane departure, tailgating
- ✓ Driver monitoring (DSC): phone use, smoking, fatigue, distraction
- ✓ Real-time in-cab audio alerts + footage to remote dashboard
- ✓ Built-in 4G, GPS & Wi-Fi • storage up to 1TB
- ✓ Expandable to 4 channels (+AHD, +IP camera)
- ✓ CE / FCC / IC • E-marked (UNECE R10)

02

C6 Lite 2.0

S & D Versions • Entry-level Fleet AI

- ✓ S: single road-facing ADAS camera (expandable +1 AHD)
- ✓ D: dual road + driver-facing (ADAS + DSC monitoring)
- ✓ Up to 1080p capture • dual Micro SD storage to 256GB
- ✓ 6-axis G-sensor driving-event detection
- ✓ Built-in 4G, Wi-Fi & GPS positioning
- ✓ AES-256 encryption + TLS 1.3 secure transmission
- ✓ Simple OBD install • remote intercom & HD playback

Forward + driver-facing AI.
One platform.
Complete visibility
from every cab.

DETECT RISK

MOBILE APP

Your Fleet in Your Pocket

Real-time visibility. Instant insights. Smarter decisions.
Manage your fleet anytime, anywhere.

Live vehicle tracking with map clustering

Events overview with tap-to-video

Request & play event-linked clips

Journey summaries & route playback

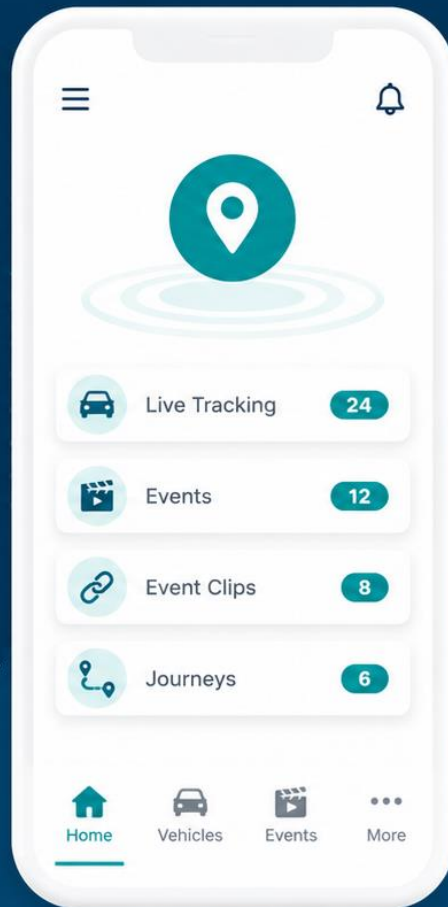

Available on iOS & Android

Available on
iOS & Android

Secure. Reliable.
Always in control.

Connect Your Systems

Power your platform with secure, real-time data and seamless integrations.

01

RESTful API

Secure endpoints for vehicle data, tracking, events, and media.
Swagger/OpenAPI documentation.

02

Real-Time WebHooks

Push notifications for events, GPS updates, journey creation, and alarm alerts.

03

Secure & Scalable

Token-based auth, role-based API access, and usage tracking at any scale.

WebHook Event Types

Event notifications

Live tracking positions

Journey creation

Alarm alerts

Your Brand. Your Language. Your Way.

White-Label Branding

Apply your colours, logos, and themes across web and mobile.

01

8+ Languages

EN, FR, ES, DE, PL, NL and more. API-driven translations.

02

Time Zones & Units

Auto time zone adjustment.
Miles or kilometres per organisation.

03

Configurable Dashboards

Users personalise widget layout for fast access to key data.

04

Data Usage & Capping

Visualise consumption at reseller, fleet, and vehicle level.
Apply caps to stay in control.
